

Traditionally, you might write the following:

```
1 @media (min-width: 500px) {  
2   /* Your styles here */  
3 }
```

SWIPE

SURPRISE AT THE END!

Now we have a simpler syntax:

```
1 @media (width >= 500px) {  
2   /* Your styles here */  
3 }
```

KEEP SWIPING

Old way:

```
1 @media (max-width: 800px) {  
2   /* Your styles here */  
3 }
```

SWIPE

New way:

```
1 @media (width <= 800px) {  
2   /* Your styles here */  
3 }
```

NOW THE SURPRISE!

You can also do it between
two widths ! ✨

```
1 @media (500px <= width <= 800px) {  
2   /* Your styles here */  
3 }
```

ONE MORE

What are other tricks you're using at CSS?
